

### Rifton Changing System

The Support Station's unique features enable even partially weight-bearing individuals to receive hygiene care or a diaper change in an upright position – making the process more dignified, improving access to clothing and skin, and [eliminating heavy lifting](#) on the part of the caregiver.

**Benefits:**

With the Support Station clients assist in the [sit-to-stand transfer](#) using their own strength and skills to participate in their care. Over time clients using the Support Station actually improve their standing and toileting skills – paving the way for greater independence and better health.
